

Cassidy M. Chaplowe

Salesforce Solution Architect | Litify Consultant | Legal Technology

San Antonio, TX • cassidychaplowe@gmail.com • [\[LinkedIn\]](#) • [\[cmconfigure.com\]](http://cmconfigure.com)

SUMMARY

I help law firms and growing organizations turn complex, non-standard business processes into scalable Salesforce and Litify solutions — reducing manual work, improving visibility, and making teams more productive. With 5,570+ hours delivering Salesforce/Litify solutions across legal, healthcare, technology, education, financial services, and field-service industries, I've led 10 end-to-end Litify implementations across diverse legal practice areas, each taken from discovery through go-live and hypercare, with a 100% successful delivery track record. I specialize in the parts of Salesforce architecture that don't fit neatly into out-of-the-box functionality — custom data models, automation, and integrations built around how a business actually operates.

SERVICES

- **Salesforce Architecture & Strategy** — Design scalable Salesforce environments aligned to business objectives.
- **Litify Implementation** — Discovery, configuration, customization, migration, deployment, training, and post-go-live support.
- **Business Process Automation** — Identify manual, error-prone processes and convert them into automated Salesforce workflows.
- **Salesforce Optimization** — Evaluate existing environments, resolve technical debt, and improve usability, automation, and reporting.
- **Integration & Data Architecture** — Connect Salesforce with third-party applications and design sustainable, scalable data structures.
- **Fractional Salesforce Architecture** — Senior Salesforce architecture expertise for organizations that need the skill set without a full-time hire.

AREAS OF EXPERTISE

Salesforce Architecture: Solution Architecture • Data Modeling & Migration • Salesforce Flow • Apex • Lightning Web Components • Custom Objects • Integrations • Metadata Deployment • Technical Debt Reduction • Gearset • Visual Studio Code

Business Transformation: Discovery & Requirements Analysis • Process Mapping & Workflow Redesign • Automation • Operational Efficiency • Reporting & Analytics • Legal Workflow Design • Change Management

Consulting Leadership: Executive & Stakeholder Engagement • Solution Design • Project Milestones • User Acceptance Testing • Training • Go-Live Planning • Client On-Site Support • Product Hypercare

Litify & Legal Technology: Litify • Intake & Matter Management • Docrio • Email/Calendar Sync • DocuSign Automation • Law Firm Implementations

Cross-industry range: beyond legal technology, I've delivered Salesforce solutions across healthcare & medical imaging, dental technology, SaaS & cloud infrastructure, IT & cybersecurity, professional education, private equity, field services, and consumer electronics — experience that lets me recognize patterns across industries and apply proven approaches to complex, non-standard business processes wherever they show up.

PROFESSIONAL EXPERIENCE

Solution Architect | Banjaxed Solutions

May 2023 — Present

- Led 10 end-to-end Litify implementations across diverse legal practice areas — Personal Injury, Asbestos, Government Takings, Pharmaceuticals — owning each engagement from discovery through go-live and post-launch support.
- Designed and built Salesforce/Litify solutions using Flow, Apex, Lightning Web Components, custom objects, and third-party integrations, translating attorney and firm-leadership requirements into scalable data models and automated workflows.
- Partnered directly with attorneys, firm leadership, and administrators to run discovery sessions, document solution design, and drive process improvements across complex legal case lifecycles.
- Reduced manual task-tracking time by an estimated 200+ hours per month per firm through custom automation and Matter Plan task lists.
- Managed concurrent implementation projects — coordinating requirements gathering, UAT, training, deployment, and hypercare — while maintaining 100% successful delivery across all 10 engagements.

Salesforce Consultant / Development Team Lead | Banjaxed Solutions May 2022 – May 2023

- Directed a team of 3 Salesforce developers, delivering solutions across 9 clients spanning private equity, professional education, cybersecurity, dental technology, SaaS, medical imaging, and field services.
- Translated client business requirements into Salesforce architecture, automation, and custom CRM functionality, overseeing development priorities and quality assurance across concurrent projects.
- Supported implementations and enhancements for clients including Blueprint Equity, ACI Learning, 3D Smiles, CoreView USA, Enzu, Stratem, Summit Imaging, Ready Power USA, and Grace Digital.

SELECTED LITIFY IMPLEMENTATIONS

Full case studies are available in the CM Configure Capability Statement and at cmconfigure.com.

- ❖ **Asbestos Litigation** — Built a custom Client Matter structure to support multiple named Defendants, Client Probate for deceased claimants, and multi-party Settlement splits, with a Fee Split Calculator and settlement forecasting.
- ❖ **Personal Injury / Workers' Compensation** — Built custom Litify Questionnaires, intake tooling, Matter Plan task lists, and a DocuSign integration with automated status tracking to move Matters through pre-litigation and litigation stages.
- ❖ **Government Takings** — Created a Primary Matter grouping structure and custom Property Location objects to group cases by property and court filing number, enabling settlement reporting by price per square foot.
- ❖ **Pharmaceutical Litigation** — Developed Product- and Facility-specific intake questionnaires and a custom CMO deadline component to manage court-mandated deadlines and settlement forecasting by product.

SALESFORCE TECHNOLOGY

Litify • Screen Flow • Lightning Record Pages • Apex • Lightning Web Components (LWC) • Custom Objects • Data Modeling • SOQL • Integrations • Metadata • Gearset • Record Triggered/Scheduled/Autolaunched Flow Automation • Intake & Matter Management • Visual Studio Code • Claude Code • Docrio • DocuSign • Zapier • RingCentral • MailChimp • Reports/Dashboards • Experience Cloud Sites • External Client Apps • QuickBooks • Outlook Integration • Gmail Integration • Jira • ClickUp • Webhook API • Shopify • Calendly • Slack • Twilio • AWS
